How to Apply Press-on Nails

Preparation:

Step 1. File your natural nail to a length that is shorter than press on nail length.
Step 2. Gently align the rounded part of the cuticle pusher with the edge of your cuticle
Step 3. Gently push back cuticles.
Step 4. Buff your nails to remove any debris.
Step 5. Rinse your nails without using soap to remove any dust.
Step 6. Dry hands thoroughly.
Step 7. Without using glue, determine nail sizing by placing press on nails on top of your natural nails. (Figure 1)

Step 8. Press on should cover the whole nail without touching skin.
Step 9. After sizing, wipe your natural nails with alcohol wipes to remove any oil.

Application:

Step 1. Align the end of the **nail glue bottle** with your natural nail.
Step 2. Squeeze the glue out of the bottle onto your nail and cover the whole nail with a thin layer of glue.
Step 3. Press the bottom of the press-on nail onto the bottom of your nail by your cuticle at a **45-degree angle** to natural nail. (Figure 2)

Step 4. Press down firmly on the nail to secure, hold for **30 seconds**.
Step 5. Take a q-tip and dip in acetone nail polish remover
Step 6. Wipe the skin around the nail to remove any glue off your skin around nails.
Step 7. Repeat application steps on each nail.
Step 8. Keep nails dry for a minimum of one hour after application.

Removal:

Step 1. Pour a shallow amount of acetone nail polish remover in a glass bowl.
Step 2. Place nails in acetone and soak for 10 minutes. (Figure 3)

Step 3. Remove nails from acetone.
Step 4. Gently try to lift the press on nail.
Step 5. If there press-on does not move, soak nails for another 5 minutes and repeat until the nails easily come off.
Step 6. After removing the press on nails, use a cotton ball soaked with acetone nail polish remover to scrub any excess glue off nails with acetone.
Step 7. Wash hands with soap thoroughly.
